Work Experience

Full Stack Software Engineer Intern Stellanex Pvt. Ltd

June 2026 - Aug 2026
Remote

- Built and contributed to the Xypher Engine, a robotics development platform, using **Next.js, React, Tailwind CSS, and Django/Python**, implementing the platform's web architecture, authentication flows, dashboards, documentation, and design partner portals across a decoupled frontend-backend stack.
- Developed a secure **Next.js + Django API architecture** with a service-layer backend, API proxying, schema validation using **Zod**, JWT/session-based authentication, **CSRF protection, secure cookies, rate limiting, password recovery features** to keep it secure and up.

Software Developer Intern FuzenApps Solutions Pvt. Ltd

Sep 2025 - Nov 2025
On-site Nashik, Maharashtra

- Contributing to an **AI-first startup** by developing **reusable, dashboard-based web templates** and refining the **frontend architecture** for scalability.
- Worked with **Ruby on Rails (ERB)** and **JavaScript** to build and optimize UI components, enhance data flow between views and controllers, and maintain clean, production-ready code.

Engineering Intern - Frontend Softdel Systems Pvt. Ltd

May 2025 - Aug 2025
On-site Pune, Maharashtra

- Built a reusable **React.js UI library** with data grids and dashboards, bundled via **Rollup.js** and documented using **Storybook** for internal use.
- Led **Angular + TypeScript** frontend for a live **Contract Management Portal**, implementing multi-step approvals, **RBAC**, and seamless **Node.js API** integration.
- Worked in **Agile team**, contributed to **SRS writing, sprint planning**, and delivering production-ready enterprise software through regular reviews and stand-ups.

Skills

- Programming Languages:** Python, JavaScript/TypeScript, SQL
- AI/ML:** LLMs, RAG, Generative AI, Prompt Engineering, OpenAI API
- Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS
- Backend:** Node.js, Express.js, REST APIs, Django
- Databases:** MySQL, MongoDB, PostgreSQL
- Tools & Platforms:** Git, GitHub, Docker

Projects

FedLens | Monetary Policy Intelligence Engine

- Built an evidence-grounded **AI system** that ingests **FOMC statements**, meeting minutes, and FRED economic data to extract structured policy assessments across inflation, labor market, growth, financial conditions, and rate guidance using **LLMs, Pydantic**, and **prompt engineering**.
- Implemented **hybrid RAG using BM25, vector search, RRF, and cross-encoder reranking** for citation-backed Q&A. Built deterministic statement diffing, sentence alignment, and claim-to-indicator mapping to detect policy changes and identify gaps between Fed narrative and economic data using **Python, FastAPI, PostgreSQL**, and **pgvector**.

Trading Strategy Research & Backtesting Engine | Python

- Built a modular **quantitative research** and backtesting framework for **Forex** market data, including data validation, gap and timezone handling, multi-timeframe OHLC generation, deterministic data access, and realistic market-data preparation for systematic strategy research.
- Designed the framework around **strategy, data-feed, execution, portfolio, ledger, and performance-analysis components**, supporting transaction costs, spread/slippage modelling, drawdown analysis, and strategy evaluation. Used the engine to research and test strategies, with the aim to validate trading concepts.

Education

- MET's Institute of Engineering, Nashik | Bachelor of Engineering**
CGPA: 8.48

Graduated 2026
